FEATURES

Litter bin manufactured from perforated 1.5 mm thick steel plate, reinforced with two 30 x 15x 1.5 mm oval profile tubes on the upper and lower sections and a mortice lock to the side.

The upper and lower sections are 6 cm and the central section 16.5 cm.

Incorporates a detachable basket which swivels on a pivot, operated manually by unlocking a clamp.

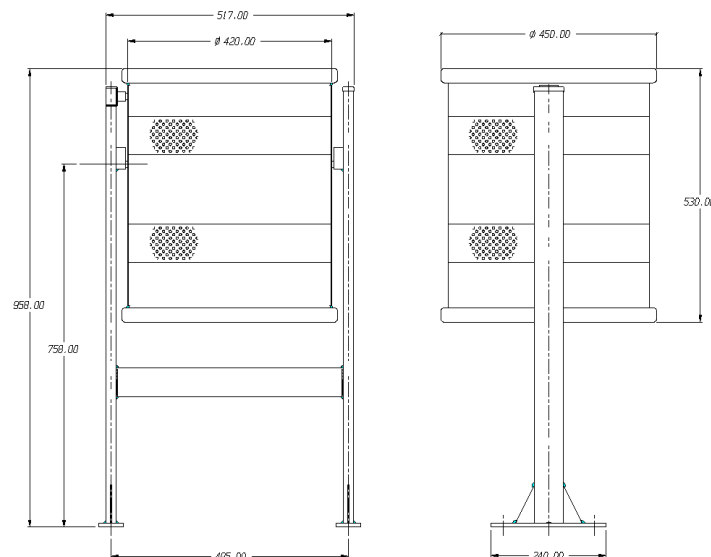

Base: 1.5 mm thick steel plate and 8mm perforations for drainage.

Mounting post: oval shaped tubular structure 60 x 20 x 1.5mm.

Fixing system: oval profile 60 x 20 x 1.5mm thick steel mounting post with a 17 mm perforation for an RFID chip.

It is fixed to the ground by two base plates welded to the legs of the mounting post having 2 x 12 mm drill holes allowing the structure to be screwed to the ground using universal anchoring bolts, or M 10 x 80 mm screws in each of the 4 provided drill holes.

Optional customisation by stamping.
